

Constellation Response x AT-LABS

THE RESPONSE CRATE MINI

Five radios. One box. Ready when you are.

WHAT'S IN THE BOX

5 × RM-2 Radios	2W LoRa mesh radios, HAM licensed. U.S.-manufactured PCB. Field-tested during Hurricane Helene.
Built-in Cradles	Radios charge while stored. No loose cables, no fumbling on scene.
Rugged Enclosure	17 × 14 × 7" Pelican-style case. Built to take the same abuse as the radios inside.
External Power Input	Charges via vehicle outlet, generator, or shore power.

WHO IT'S FOR

Pilot Programs	Evaluate AT Labs mesh comms before committing to a full Response Crate.
Crate Expansion	Add radio capacity to an existing Response Crate deployment.
Smaller Units	Volunteer orgs and smaller teams that need a complete, ready-to-go kit.

ECOSYSTEM COMPATIBILITY

Meshtastic Firmware	Open source, field-proven mesh protocol. Connects seamlessly with RM-1, RM-2, and Response Crate deployments.
TAK Compatible	Works with ATAK, WinTAK, and iTAK infrastructure.
RM Accessories	All AT Labs RM-family accessories are compatible.

THE RADIOS

Every RM-2 ships with Meshtastic firmware and a U.S.-manufactured PCB. Field-tested during Hurricane Helene and built to survive the mission.

WARRANTY & SUPPORT

Every Response Crate Mini comes backed by:

- Full 1-year warranty on all five radios
- Support and replacement plans available for agencies
- Direct access to AT Labs and Constellation Response for ongoing needs
